

# Exercise 2 Answers

**Note:** Your descriptions don't have to match mine exactly. I try to come up with wording that adds more information than just parroting back the title. Sometimes, though, it gets awkward to do that, and so I just paraphrase the title.

## Retrieve an Album

Returns data about the specified collection of images.

```
GET https://example.com/api/v1/album/{album ID}
```

where {album ID} is the ID of the album to retrieve.

## Create an Album

Creates a new collection of images.

```
POST https://example.com/api/v1/album
```

## Update an Album

Updates an existing collection of images.

```
PUT https://example.com/api/v1/album/{album ID}
```

where {album ID} is the ID of the album to update.

## Delete an Album

Deletes a collection of images.

```
DELETE https://example.com/api/v1/album/{album ID}
```

where {album ID} is the ID of the album to delete.

## Retrieve a List of All Albums

Returns a list of all albums.

```
GET https://example.com/api/v1/album
```

## **Print an Album**

Sends an album to be printed.

POST `https://example.com/api/v1/album/{album ID}/print`

where `{album ID}` is the ID of the album to be printed.
