Exercise 1 Answers

Create a Pet

Use **POST /pet**

The POST body should look something like this:

```
{
  "id": 1036,
  "name": "Bela Bardog",
  "status": "available"
}
```

Retrieve Your Pet

Use **GET /pet/{petId}**

Put in your ID (1036, in this case), and you should see the following:

Request URL: http://petstore.swagger.io/v2/pet/1036

Response Body:

```
{
  "id": 1036,
  "name": "Bela Bardog",
  "photoUrls": [],
  "tags": [],
  "status": "available"
}
```

Update Your Pet

Use **PUT /pet**

For the Request Body, you'll need everything you had before, but with the new status.
```
{
  "id": 1036,
  "name": "Bela Bardog",
  "status": "sold"
}
```

Remove Your Pet

Use **DELETE pet/{petId}**

Put in your petId (1036, in this case).
